Education

Master of Science in Applied Computer Science
California State University, Fullerton
December 2027 (expected)

Bachelor of Science in Computer Science, Minor in Mathematics
California State University, Fullerton
December 2025

Experience

Spacetime Engineering (Lyntris), Los Angeles, CA

RF Test Technician (Jun 2026 - Present)

- Write drivers and automation programs for RF testing with network analyzers and related devices.
- Create CD pipeline with rollback strategy for releasing internal software.
- Test, tune, and assemble microwave feeds and components (e.g., diplexers, OMTs, waveguides).

acm@CSUF, Fullerton, CA

Open Source Team Lead, FullyHacks Web Lead (Jan 2025 - Present)

- Write and maintain club's applications, CI pipelines, cloud infra, and technical documentation.
- Design and lead workshops on industry-standard technologies (e.g., Advanced Git, Rust, GitHub Actions, REST APIs).
- Lead developer for acmcsuf.com's data layer and cloud infrastructure.
- Web team lead for FullyHacks, CSUF's yearly hackathon with 400+ attendees.

theCoderSchool, Torrance, CA

Code Coach (Mar 2026 - Present)

- Work 1-on-1 and 1-on-2 with K-12 students to create projects with Unity, Python, JavaScript, Scratch, and other technologies.
- Teach programming and soft skills for software development.
- Configure DNS records and Cloudflare security policies to offer free production domains to advanced students.

Projects

Spacetime Engineering Report Generator

Technologies: Python, scikit-rf, Pandas, NumPy, lets-plot, multithreading
Role: Sole Developer

- Create user stories and technical requirements to address problem of poor-performing internal tools.
- Implement program to achieve 10x performance gain and improved usability over legacy solution.
- Write algorithms to compute worst-case values (e.g. axial ratio) from up to ~120k rows of frequency data.
- Create plot renderer to replace VNA screenshots on customer reports.

api.acmcsuf.com

Repository: github.com/acmcsufoss/api.acmcsuf.com
Technologies: Go, Gin, SQLite, OpenAPI, Nix, GitHub Actions, Fly.io, Cobra
Role: Project co-leader & lead developer

- Lead developer of acm@CSUF's REST API that manages data for club of 2,500 members.
- Create tasks, delegate work, and write/review code for team of 7 core developers.
- Create & maintain CI/CD pipeline to speed up development cycle and reduce programming errors.
- Created reproducible development environment with Nix and wrote comprehensive technical docs, minimizing onboarding time.

Productivity App

Repository: github.com/tomasohchom/motion
Technologies: Go, Terraform, TypeScript, TanStack, React, MinIO, AWS, Docker
Role: Back-end developer & DevOps lead

- Led development of backend Go microservices.
- Containerized services for deployment with AWS Fargate.
- Wrote Terraform Infrastructure as Code (IaC) for reproducible deployments.
- Wrote integration and end-to-end tests for automated testing in CI pipeline.

Technical Skills

Languages: Python, C++, C, Go, Java, Typescript, Lua, bash, SQL, PowerShell, HTML/CSS
Technologies: Gin, FastAPI, Django, Next.js, React, Cloudflare, AWS, Terraform, Pandas, POSIX threads, systemd
Dev Tools: Nix/NixOS, Proxmox, Linux, Docker, Git, GitHub Actions, Vim
