Education

Bachelor of Science in Computer Science, Minor in Mathematics
California State University, Fullerton
August 2023 - December 2025

Technical Skills

Languages: Python, C++, C, Go, Java, Typescript, Lua, bash, SQL, PowerShell, HTML/CSS
Technologies: Gin, FastAPI, Django, NextJS, React, Cloudflare, AWS, Terraform, Pandas, POSIX threads, systemd
Dev Tools: Nix/NixOS, Linux, Docker, Git, GitHub Actions, Vim

Projects

acm@CSUF Data Layer (api.acmcsuf.com)

Repository: github.com/acmcsufoss/api.acmcsuf.com
Technologies: Go, Gin, SQLite, OpenAPI, Nix, GitHub Actions, Fly.IO, Cobra
Role: Project co-leader & lead developer

- Lead developer of acm@CSUF's REST API that manages data for club of 2,500 members.
- Create tasks, delegate work, and write/review code for team of 7 core developers.
- Created & maintain CI/CD pipeline to speed up development cycle and reduce programming errors.
- Created reproducible development environment with Nix/direnv and wrote comprehensive technical docs, minimizing onboarding time.

Productivity App (Motion)

Repository: github.com/tomasohchom/motion
Technologies: Go, Terraform, Typescript, Tanstack, React, MinIO, AWS, Docker
Role: Back-end developer & DevOps lead

- Led development of Go services for microservices architecture backend.
- Containerized services for eventual deployment to cloud using AWS Fargate.
- Wrote Terraform Infrastructure as Code (IaC) for reproducible deployments.
- Wrote integration and e2e tests for automated testing in CI pipeline.

Secured Link Shortener + Client (shorter2)

Repository: github.com/acmcsufoss/shorter2
Technologies: Cloudflare Workers + KV, Hono, Discord, Typescript, Bun
Role: Lead Developer

- Identified suboptimal service used by club and rewrote with modern architecture.
- Shortlink microservice and Discord app share generated token for secure communication, using Discord roles to validate users.
- Create monorepo architecture for shared DTO models and lock-step development between packages.
- Implement caching strategy for cost-effective list operations.

Experience

Lyntris, Los Angeles, CA

RF Test Technician (Jun 2026 - Present)

- Test, tune, and assemble large ground antenna components (e.g., diplexers, OMTs, waveguides).
- Configure and use SOTA vector network analyzer for frequency band, waveguide size, and desired loss.
- Write internal tools with PowerShell and VBScript to optimize team's workflow.

theCoderSchool, Torrance, CA

Code Coach (Mar 2026 - Present)

- Work 1-on-1 or 1-on-2 with K-12 students to create projects with Unity, Python, JavaScript, Scratch, and other technologies.
- Teach technical skills and programming, as well as soft skills for software development.

acm@CSUF, Fullerton, CA

Open Source Team Officer (Jan 2025 - Dec 2025)

- Write/maintain applications, CI pipelines, cloud infra, and technical documentation.
- Improve performance, security, and developer experience for all applications.
- Led workshops and demos on industry-standard technologies (e.g., Advanced Git, Rust, GitHub Actions, REST APIs).
- Lead developer for back-end web services and infra.
